

MEDIANT CCE APPLIANCES FOR SKYPE FOR BUSINESS CLOUD CONNECTOR EDITION

AudioCodes **Mediant CCE Appliances for Skype for Business Cloud Connector Edition** bundle AudioCodes session border controllers (SBC) and gateways into one integrated package that is easy to deploy and manage.

The AudioCodes Mediant CCE Appliances for Skype for Business Cloud Connector Edition integrate with Skype for Business Cloud Connector Edition recommended architectures, providing on-premises connectivity infrastructure. Enabling integration with heterogeneous systems and legacy PBXs, which are critical for a smooth migration to the cloud, AudioCodes' Microsoft-certified SBCs offer enterprise-grade security and reliability.

Additionally, AudioCodes' SBCs can add value by delivering enhanced features such as advanced dial plan settings, high availability on incoming calls, support for analog devices and support for call recording from the PSTN side. The combined solution of Skype for Business Cloud Connector Edition with AudioCodes' infrastructure ensures a smooth migration for enterprise customers who want to move their users to the latest cloud unified communications platform from Microsoft Office 365, while preserving on-premises connectivity with their local service providers.

Mediant 800 CCE Appliance

The AudioCodes **Mediant 800 CCE Appliance** bundles our field-proven SBCs and gateways with the Skype for Business Cloud Connector Edition into an elegantly packaged 1U chassis that is easy to deploy and manage.

The Mediant 800 platform supports up to 180 concurrent sessions and a variety of TDM configurations.

Mediant Server CCE Appliance

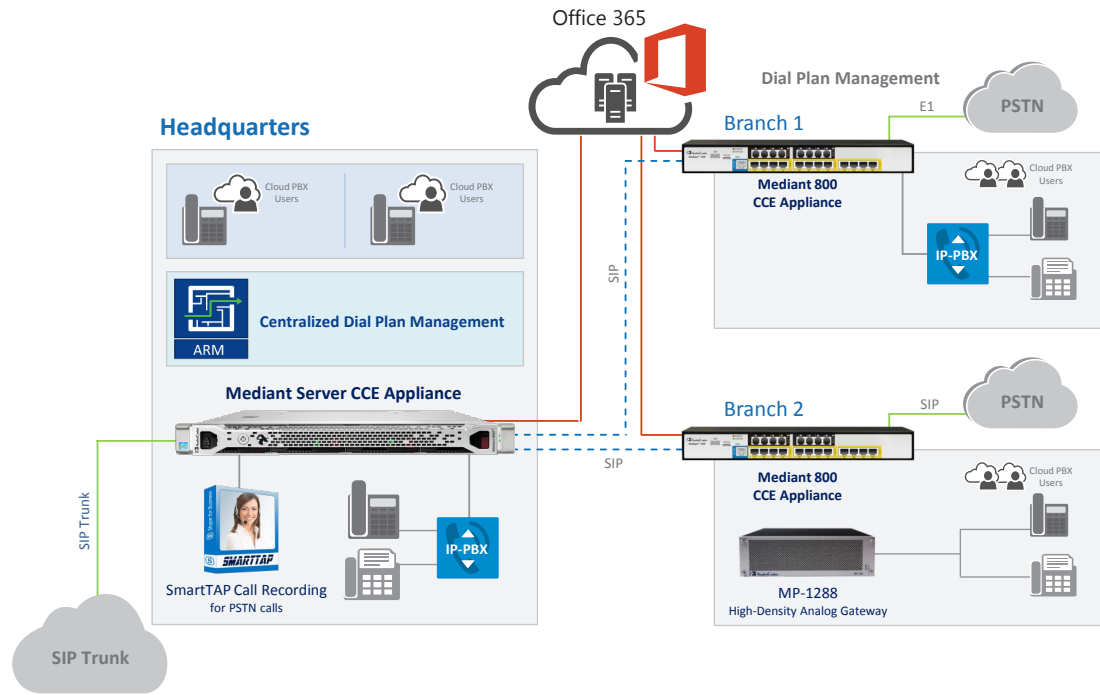

Based on a powerful HP server, the **AudioCodes Mediant Server CCE Appliance** delivers the Cloud Connector integrated with the AudioCodes SBC for organizations or enterprise branches with typically up to 2500 users.

The Mediant Server CCE Appliance supports up to 500 concurrent sessions.

Highlights:

- Microsoft-qualified platforms
- Secured SIP trunk connectivity
- PBX and IP-PBX integration
- PSTN connectivity
- Advanced dial plan capabilities
- High availability for incoming/outgoing calls
- CDRs for PSTN calls
- Integrating analog devices into the Cloud PBX environment
- Recording of PSTN calls (SmartTAP)
