## A New Approach to the Session Border Controller

Feature-rich, high performance and easy to use virtual session border controllers from TelcoBridges

# The business model for communications software is changing

FROM	TO
Hardware-centric CAPEX	→ Software-centric OPEX
Large up-front costs	→ Pay-as-you-grow
Maintenance and Upgrade Fees	→ Software subscriptions with support and automatic upgrades
"Buy to Try"	→ Download Free evaluation software

## Leading analysts agree that the market is shifting to virtualized and cloud-based SBCs

Over 75% of SBC deployments will be virtual or cloud-based by 2022 (according to Exact Ventures)

TelcoBridges has a new approach, changing the way Session Border Controller software is being deployed and sold with a new business model and market approach:

- ProSBC with enhanced features, regular updates and vendor support
- Annual subscription-based pricing

### FreeSBC & ProSBC by TelcoBridges Benefits:

- Carrier-grade Session Border Controller software
- Feature rich with service provider and enterprise features
- High-performance and compact, supporting up to 60,000 sessions/server
- Flexible deployment options with virtualized, cloud and VNF versions
- Can be deployed as a VNF on uCPE, on AWS, Azure, or on VMware, KVM/OpenStack, or bare-metal servers
- Immediate software download with online activation and payment
- The product benefits from over 10 years of SIP deployment experience and SIP software development
- FreeSBC includes all the basic SBC functions
- ProSBC subscriptions are \$1/session/server/year (see page 4 for details)
