

FEBRUARY 2024

TELEMATICS

Product Catalog

"

The first 2024 Product Catalog is packed with smart GPS devices and covers a wide range of industry needs

DEAR READER,

Teltonika Telematics is proud to present its first 2024 Product Catalog, featuring asset trackers with magnetic tamper detection, prolonged autonomous usage, and the new EYE devices reinforced for use in challenging conditions to drive your business forward.

Among the highlights is the tamper-proof asset tracker TAT240, which offers extended battery life, robust connectivity, and advanced security features for optimal asset monitoring. Further on, explore the distinctive ATEX-certified EYE Beacon and EYE Sensor built to withstand hazardous environments and deliver real-time insights.

Don't miss FMC234, a powerful fleet management GPS tracker equipped with a large-capacity internal battery and handy features to streamline your operations. Rest assured, this comprehensive catalog covers a wide range of industry needs with solutions for logistics, construction, agriculture, and more.

Remember the first 3 vehicle GPS trackers based on the new FT platform - FTC921, FTC961, and FTC881 models? Their production is about to start, and the trackers will be available to order. Our business partners and we have high expectations for their market debut.

I urge you to take a look at the catalog, as it is full of items and information that you may find interesting. There is a wide range of products to explore, each with its own unique features and value. May you find value in every page, and may the knowledge you gain empower you to make the most of every project you manage.

ANTANAS ŠEGŽDA CEO, Teltonika Telematics

TABLE OF CONTENTS

8 ——	FT PLATFORM		
9	FTC921		
9	FTC961		
9	FTC881		

Incredibly simple installation in minutes to experience the benefits of vehicle telematics in the most time-efficient manner. No special skills or tools are required to mount these GPS devices. Literally, fast and easy!

14 –	FMC880
16 -	FMC800/FMM800
17 -	FMM80A
18 -	FMB010/FMB020
19 -	FMP100

Simple but smart vehicle GPS devices for basic tracking solutions, applicable to a great variety of use cases and scenarios. They are compact, reliable, accurate, affordable, and incredibly popular!

22	FMB930
24	FMC920
26	FMB910/FMB900
27	FMB965

58

E-MOBILITY

The trackers that have accurate location reporting, remote lock/unlock features, battery level and status data, etc. From sharing services and fleet management to anti-theft and cargo delivery applications, these devices are ideally suited for e-scooters, e-bikes, e-forklifts, and other smart e-vehicles.

0		$\langle \rangle \rangle \langle \rangle$	
•			

Comprehensive vehicle telematics solutions for professional applications and the most demanding customers. These GPS trackers allow the download of digital tachograph files, may read CAN bus data, and connect to an impressive variety of external accessories and equipment.

USE CASES

The world we live in today is connected. Inspired by the creativity of our customers and business partners, we share potential use cases that show how Teltonika Telematics products can help in various industry sectors.

Fleet telematics

Merging the best of telecommunications and informatics, telematics offers unique ways to monitor a vehicle. From motorbikes to heavy trucks and lorries, from a single passenger car to huge fleets – there is a solution for each and every client. Telematics is the key to effective resource management, optimisation of costs, and safety across a range of industries.

Logistics & delivery services

Modern-day logistics require a considerable amount of information for business optimisation. It is not enough just to get the GPS coordinates of your vehicle's current location. With fuel consumption, driven distance, and many other parameters at hand, you will manage your fleet resources effectively. No expenses will be left unaccounted for. Monitoring driver activities will allow you to be in control of your staff, while temperature data will make you sure that goods are delivered of high quality.

E-mobility management

The trackers that have accurate location reporting, remote lock/unlock features, battery level and status, data, etc. From sharing services and fleet management to anti-theft and cargo delivery applications, these devices are ideally suited for e-scooters, e-bikes, e-forklifts, and other smart e-vehicles.

Utility & emergency transport

The safety and life quality of our society highly depend on the ability to manage the transport of utility and emergency services properly. Owing to our solutions, operators will always know the current location and status of any vehicles, including maintenance machinery, ambulances, police fleets, etc. With the help of modern tracking technology, timely responses to unforeseen situations and efficient routine operations can be effectively ensured.

Driver safety

In the dynamic landscape of vehicle telematics, ensuring driver safety is

paramount. It underlines our commitment to making journeys safer, smarter, and more efficient. Harnessing the power of telematics, Teltonika GPS trackers and accessories help monitor driver behaviour, predict potential hazards, and ultimately protect the most valuable asset of all – people.

Car sharing, rental & leasing

Knowing vehicle's current location, status, and track history is crucial for all car sharing and rental service providers. Gain full control of your fleet with our solutions – prevent theft with remote car lock management, receive notifications of possible contract violations, and monitor driver behaviour and areas where the vehicles are driven.

Agriculture, construction & mining

With our innovative telematics solutions, you will have full control over the agricultural machinery by knowing its current position, driver activities, and other vital information. Similarly, managing construction and mining machinery is a complex task that can lead to huge expenditures if done improperly. The benefits of using our GPS tracking devices include protecting your equipment from theft, reducing fuel expenses, and enhancing safety.

Assets & workforce

There are countless fleet assets and items around the world that are difficult

to track and locate manually. Asset GPS trackers are designed to effectively monitor such items and provide additional protection against theft. Even more, Teltonika autonomous workforce tracking devices ensure the personal safety of vulnerable people and those who carry out activities without close supervision by others, such as healthcare, maintenance, social, and lone workers.

FAST & EASY

QUICK

installation and device setup with no special skills or tools required

IDEAL

choice to install large quantities of devices in a short period of detailed crash trace data

ACCURATE

13

KEY FEATURES

Improved GNSS tracking accuracy*

Standalone L1 and L5 dual-band GNSS receiver ensures better track quality and quick time to first fix

Fast installation

Virtually anyone can mount the device in 5 minutes or less directly on a car battery

Compact & robust casing

IP65-rated casing is designed to withstand poor weather conditions

CONNECTIVITY OPTIONS

FMC880 4G

FMM880 | M1

Reliable 4G (LTE Cat 1) connection with fallback to 2G (GSM) network

Supports both LTE Cat M1 and NB IoT connectivity

Accurate and detailed crash trace data: Crash detection functionality based on 3-axis built-in accelerometer with fully configurable parameters through our software to ensure accurate crash trace data

PINOUT

FMT100 | 2G

Base model that supports GSM, Quad-band 2G network

KEY FEATURES

Future-proof network support

Global network coverage for a wider range of markets and projects

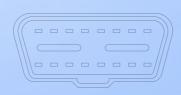

OBD port connector

Hassle-free wireless device installation to save company resources and preserve vehicle warranty

Crash detection

Built-in accelerometer ensures accurate crash trace data for evaluation, evidence, and prompt emergency calls

CONNECTOR

FMM80A M1

Plug & Play tracker designed for North America

KEY FEATURES

Reliable global coverage

LTE Cat M1 and NB IoT connectivity support with fallback to 2G ensures wide-ranging coverage for your fleet management needs

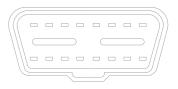

Effortless Plug & Play installation

Simply plug the device in OBD-II port and start tracking

Accurate and detailed crash trace data

Crash detection functionality based on 3-axis built-in accelerometer with fully configurable parameters through our software to ensure accurate crash trace data

CONNECTOR

Plug & Play trackers for a wide range of use cases

FMB641 2G

Tracker with tachograph and CAN data reading capability

KEY FEATURES

Remote download of tachograph files and live data

Tachograph live data reading via K-Line, ALL-CAN, Tacho CAN, or FMS connections for everyday driver management and fleet efficiency

CAN data reading from heavy vehicles and special machinery

Read J1939 data that includes standard CAN FMS from heavy vehicles like trucks and raw J1939 data from special machinery, such as construction cranes or electric buses

Connecting external devices

2x RS232 and 1x RS485 serial communication interfaces for connecting external devices, such as thermographs, sensors, RFID readers, and more

PINOUT

AIN 3	10 20	K-Line
DOUT 2	9 19	DOUT 1

Water-resistant trackers with RS485 and RS232 interfaces

KEY FEATURES

Future-proof network support

Reliable 4G LTE Cat 1 network coverage with fallback to 2G – guaranteed future-proof network support for your fleet

Protection against dust and water

Robust IP67-rated casing provides trusted protection against dust and resistance to water

Significantly lower roaming costs

Dual SIM considerably reduces roaming costs

PINOUT

INPUT 6 IGNITION (DIN 1) RS232-TX RS232-RX AIN 1 +10...30 V DC

KEY FEATURES

Future-proof network support

Reliable 4G LTE Cat 1 network coverage with fallback to 2G – guaranteed future-proof network support for your fleet

Fuel monitoring and more

RS232, RS485 serial interfaces for fuel monitoring and other external data reading

Significantly lower roaming costs

Dual SIM considerably reduces roaming costs

CONNECTIVITY OPTIONS

FMC125 | 4G

Reliable 4G (LTE Cat 1) connection with fallback to 2G (GSM) networks

FMB125 | 2G

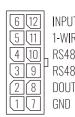

Base model that supports GSM, Quadband 2G network (external GNSS antenna) FMM125 M1 Supports both LTE Cat M1 and

Teltonika DualCam support: Connecting via RS232 to get videos and pictures of the events that might happen on the road or inside a vehicle

PINOUT

INPUT 6 IGNITION (DIN 1) RS232-TX RS232-RX AIN 1/DIN 2 +10...30 V DC

INPUT 5 1-WIRE DATA RS485-B RS485-A DOUT 1 GND

FMB125 | 2G

Supports both LTE Cat M1 and NB IoT connectivity

Base model that supports GSM, Quadband 2G network (internal GNSS antenna)

ASSETS & WORKFORCE

RELIABLE

tracking of non-powered assets and equipment for enhanced safety

EXTRA

security against theft and misplacement of your valuable

rackers to ensure the safety c one workers and vulnerable

AUTONOMOUS

TELTONIKA | Telematics

TAT240 4G

Tamper-proof asset tracker with 4G LTE Cat 1 connectivity

KEY FEATURES

Tamper alerts for maximum safety

Reliable magnetic tamper detection ensures the topmost safety of your assets

Movement-based periodic reports

Define your own data sending frequency based on whether your assets are moving

Easy magnetic mounting

Attach the device firmly and effortlessly with the included magnetic mounting holder

Backup tracking the easy way

Ideal to be used as a backup tracker – easy to hide anywhere in a vehicle thanks to a compact size, while sleep mode protects against detecting tracker by thieves

TAMPERING DETECTED!

Increase your asset safety with tamper-proof TAT240

Read more

TAT141 M1

Asset tracker with 4G LTE Cat M1 connectivity

KEY FEATURES

Periodic location reports

Define your own data sending scenarios by the type of the asset you are tracking or a dedicated use case

Backup tracking the easy way

Quick set-up with Teltonika vehicle tracking devices to use TAT141 as a backup tracker for your transport's maximum safety

Effortless installation

Several mounting options to ensure fast and simple installation without any wires

Protection in extreme weather conditions

The IP68-rated enclosure ensures reliable operation in any climate and under severe temperature deviations

Asset trackers with a waterproof IP68-rated casing

KEY FEATURES

Periodic/scheduled reports

Define your own data sending scenarios by the type of the asset you are tracking or a dedicated use case

Backup tracking the easy way

Quick set-up with Teltonika vehicle tracking devices to use as a backup tracker for your transport's maximum safety

Protection against water and dust in extreme weather conditions

The IP68-rated enclosure ensures reliable operation in any climate and under severe temperature deviations

Up to 3 years battery lifetime*

Sending records once a day using cellular networks, offline modes, and battery saving scenarios for various asset tracking

GH5200 2G

Tracker for personal security and workforce management

KEY FEATURES

Two-way voice communication

Supporting up to 5 call/SMS recipients allows to transmit a text message or initiate a call instantly when immediate help is needed

Configurable buttons

5 programmable buttons can be used for amber alert, action-on-call, on-demand tracking, and many other events

Built-in man-down, alarm & no-movement detection

Special pre-programmed scenarios to ensure personal safety of lone workers and vulnerable people

Small in size & comfortable to wear

Slim design for convenient everyday use as an ID card holder that can be put on a neck or a belt

Autonomous mini GPS tracker for personal security

KEY FEATURES

Easy to reach emergency button

Instant alert messages to make a call for help in case of any incidents

Extended product usage scenarios

Bluetooth® LE-based wireless connection of external devices, including BLE beacons and sensors, to monitor temperature, humidity, magnet detection, and movement

Built-in man-down, alarm & no-movement detection

Special pre-programmed scenarios to ensure personal safety of lone workers and vulnerable people

Protection against dust and water

Use it anywhere, as the IP67-rated casing provides water and dust resistance for usage in harsh conditions

VIDEO TELEMATICS

INNOVATIVE

ways to increase significantly the safety of drivers and passengers

EXTENSIVE

features to ensure compliance with traffic rules by monitoring driver behaviour videos & photos that capture the events occurring on the roads

INVALUABLE

Driver safety and monitoring solution – PROFESSIONAL tracker and DSM camera to avoid accidents with visual monitoring functionality

KEY FEATURES

Driver notification on drowsiness, distraction, and yawning

Notifying a driver immediately with a sound alert whenever any of the integrated warning conditions are detected, such as drowsiness, yawning, distraction, smoking, phone use, or not using seat belt

128 GB for offline video storage

With up to 128 GB data storage, extensive videos are available to have full information what has happened before, during, and after the events you are interested in

Sleek and compact design

Small design provides a practical and effective solution for capturing footage while driving – positioned discreetly in the vehicle's A-pillar, it ensures that driver's front view remains clear

Periodic photo sending

Get the requested photo or set periodic image sending to the server to track and analyse events in real time as well as monitor visual data, such as pictures of events

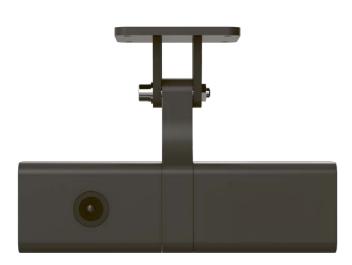

🔊 🕄 🔧 😅 📥 🍡

INSTANT ALERTS

to keep driver focused and avoid accidents

Road video monitoring solution

KEY FEATURES

Valuable visual data

Perfect for capturing both videos and photos before and after events

Data when you need it

Sending videos and photos to a dedicated server periodically or by request on chosen scenarios

Front view camera

Front camera is used to record videos of events that might happen on the road

Video file delivery to your server

Dash camera supports High Efficiency Video Coding H.265 to transmit high-quality files to your server on the cloud

FORWARD-FACING

GDPR and similar law-compliant video solution

In-cabin and road video monitoring solution

KEY FEATURES

Two cameras in one housing

Front and rear cameras are used to record videos of events that might happen on the road or inside a vehicle

Valuable visual data

Perfect for capturing both videos and photos before and after events

Data when you need it

Sending videos and photos to a dedicated server periodically or by request on chosen scenarios

Video file delivery to your server

Dual camera supports High Efficiency Video Coding H.265 to transmit high-quality files to your server on the cloud

ADAS

Designed to avoid collisions and accidents with visual monitoring functionality

KEY FEATURES

Video & photo by request

Get requested photo or video from ADAS or set periodical image sending to the server to track and analyse events in real time as well as monitor visual data (pictures or video) of events.

Contactless CAN bus connectivity

Many vehicles are available in database for using the CAN bus for turn signals, brake and speed sense etc. This makes for a much faster installation for ADAS solutions users.

Periodic photo sending

Set periodic image sending to the server. Fleet managers and dispatchers will have the latest data and access to potential collisions or common mistakes on the road.

Extended product usage scenarios

For better investigation of different events, you can request video and have full information what has happened before, during, and after all events you are interested in.

SENSORS & BEACONS

STUNNING

EYE SENSOR

Bluetooth[®] LE sensor for various application scenarios

KEY FEATURES

Sensors

Accelerometer, temperature, humidity, and magnet detection for numerous scenarios

Water-resistant casing

Robust IP67-rated casing for enhanced device longevity

Long lifetime

Up to 5 years battery lifetime to reduce financial and environmental cost

Data protocols

Eddystone, iBeacon, and Custom protocols to make it suitable for applications you need

EYE app

Intuitive Teltonika mobile app for prompt configuration and data scanning

EYE BEACON

Bluetooth[®] LE ID beacon with long lifetime battery

KEY FEATURES

Long lifetime

Up to 10 years battery lifetime to reduce financial and environmental cost

Water-resistant casing

Robust IP67-rated casing for enhanced device longevity

Data protocols

Eddystone, iBeacon, and Custom protocols to make it suitable for applications you need

EYE app

Intuitive Teltonika mobile app for prompt configuration and data scanning

Bluetooth® ID beacons and sensors to keep an eye on your assets in hazardous environment

KEY FEATURES

Locate your assets in hazardous environment

Always know the whereabouts of your assets, including the facilities in oil, gas, and chemical industries

Enhanced robustness

ATEX-certified EYE devices are additionally reinforced for use in challenging conditions

Smart design

Compact EYE devices can be conveniently mounted in 4 different ways, while IP67-rated casing ensures reliability and durability

EYE app

Intuitive and easy-to-use Teltonika mobile app for prompt configuration and data scanning

devices to use in hazardous environment

Features

FOTA WEB

Remote device management solution

Easy start

Access all your recently purchased devices without any configuration required

Automation

Scale deployment and update process by sending the configuration templates and firmware to an unlimited number of devices by just a few clicks

Grouping

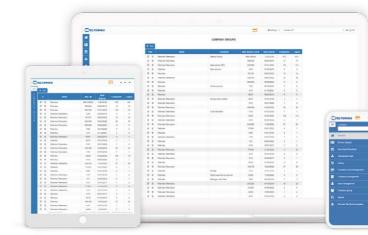

Create multilevel account structure and group your devices the way it fits your operations

History

Keep track of all the tasks performed in FOTA WEB and the status of the update for each device

Dedicated platform to automate remote tachograph download and assure regulation compliance

About

Teltonika Telematics WEB TACHO, a remote tachograph data file management solution, is easily manageable and does not require any complex software – everything is accessible via a web page, you can download tachograph files from any place and from any PC with internet access

Schedules

Downloads will be made based on configured schedule

Secure file storage

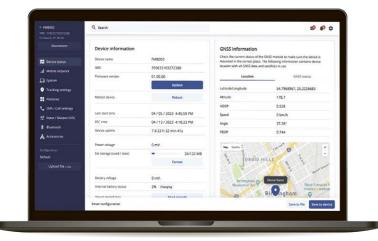

Tachograph data is stored on our secured data server and can be accessed only by authorised users

Multiple formats

European DDD, Spanish TGD, and French VB, CB

Innovative Telematics Configuration Tool unlocking the full potential of our devices

Auto update

The latest TCT version is delivered directly to your PC

User-friendly

Device settings is easy for newbies and professionals alike

Parameter search

Get directly to the settings you need

Setup wizard

Let TCT guide you through the configuration process

Telematics Configuration Tool

Get notified about software updates and use a single version of TCT for all supported devices

Cargan

SETUP WIZARD

Let TCT walk you through basic setup steps and get useful configuration tips

Connect tracking devices anywhere

About

Teltonika Telematics prepaid SIM and eSIM Connectivity Solution makes IoT simple, connecting Teltonika devices anywhere in the world and enabling device as well as SIM card management through a state-of-the-art IoT platform

500 MB, 5 years, 134 countries

With the prepaid Global Plan, you get 500 MB of data to be used for the whole 5 years in 134 world countries

Free & unlimited SMS

In all covered countries, SMS messages within the IoT Platform are unlimited and cost nothing

eSIM availability

eSIM is a smart, rewritable, and multinetwork module that can be soldered on a device directly, enabling remote SIM provisioning with SIM ID change on the go

The essential part of the Iridium Connected® telematics solution

Satelite network

Complete mobile connectivity with satellite network as a fallback

Industrial standard

RS232 is a viable choice in many scenarios due to its robustness, simplicity, and noise immunity

Worldwide coverage

Iridium satellite network with pole-to-pole coverage

Protection against dust and water

Robust IP67-rated casing provides trusted protection against dust and resistance to water

A wide range of accessories, which are fully compatible with Teltonika Telematics products, enormously expands device use cases and creates considerable added value for your business.
